Mich.
H. S. Westbrook, Esq., Winnipeg.
F. W. Stobart, Esq., Winnipeg.

Members of the Council of Manitoba University and undergraduates have access to the Isbister Library in custody of the Society.

REPORT OF THE EXECUTIVE COUNCIL.

In presenting the 19th Annual Report, the Council notes with pleasure the somewhat rising interest in the transactions of the Society by the public. There were a few instructive papers read at the Society's meetings to which there has been given favorable reception.

Mr. G. E. Atkinson's paper on the "Game Birds of Manitoba" (Trans. No. 51) was not only well received by the provincial press, but it was reproduced in its entirety in three different publications of Canada. A second paper by the same author "Birds of Prey, Etc." (not yet in print), was also well reported throughout the Province.

Dr. Bryce's paper "Sketch of the Life and Discoveries of Robert Campbell" (Trans. No. 52) also drew wide and favorable attention. Thus this Society is working on in a new Province and City, gradually establishing a sound and important Institution for posterity.

Considerable additions to the Library of a few rare volumes and other books of provincial interest have been made. Old newspapers and fragmentary tracts and papers have been rescued from dusty cupboards and put together and judiciously bound for preservation.

There were ten executive meetings held during the year, at which there has been an average of seven attending. The President was absent only once owing to sickness.

The work of the Society during the year has been more of gathering and conserving items and objects of historical interest which otherwise would soon be lost sight of, and it therefore has a claim upon the public generally in expecting at least their hearty co-operation, and their presence at the public readings of the Society's papers.

There were four additions to membership, and it is noted with pleasure that one of these is a lady, the first to join the Society. Mrs. Bryce was delegated as a representative of this Society to the meeting of the Royal Society of Canada, held in Ottawa, May 25th, 1898. It is to be hoped that other ladies will take a sufficient interest in the Society to join us.

The various Committees' reports in detail are attached, which give the work for the year.

Under the Catalogue of Exchanges, Appendix B., will be noticed a re-arrangement of the names according to an alphabetical list of places, which list shows an increase of twelve exchanges for the year, making a total of 151 societies, libraries and institutions with which this society exchanges.

G. W. WINCKLER,

Recording Secretary.

Feb. 14th, 1899.

REPORT OF THE LIBRARY COMMITTEE.

Your Library Committee begs to report that its work during the past year has been marked by a new feature of considerable importance. About a year ago the Society authorized the binding of the pamphlets that ever since its organization have been accumulating on its shelves, and also the binding of the files of several representative newspapers of the country. As a result, a large number of pamphlets, both about the North-West and of a general character, have been classified and bound, and of newspapers (in addition to The Manitoba Free Press, which has been bound from year to year for many years), the following were selected as representative of varied interests and sections, and all the files we had or could procure were bound: Edmonton Bulletin, Regina Leader, Pilot Mound Sentinel, and the Farmers' Advocate. The number of volumes added in this way was 106.

By purchase, a considerable number of volumes have been added to the Library, chiefly to the Reference Department.

Among them may be mentioned Sanderson's British Empire in the XIX Century (6 vols.), Castell Hopkins' Encyclopædia-Canada, and several of the publications of the Prince Society of Boston, of which organization, which exists for the publication of books on the early history of North America, our Society during the year became a member.

The publications of residents of Winnipeg bulked more largely than usual, and the Society had the pleasure of adding to its shelves during the year "The Making of the Canadian West," by the Rev. R. G. MacBeth; "Hudson's Bay Company's Land Tenures," by Mr. Archer Martin, now Judge Martin, of Victoria, B.C.; "Black Rock," by the Rev. C. W. Gordon; "John Black, the Apostle of the Red River," by Dr. Bryce; "Critical Study of In Memoriam," by Dr. King; and "Wild Animals I Have Known," by Mr. Ernest Seton Thompson (now of New York). Four of these six gentlemen are, or have been, members of our Society.

The volumes added to the Library during the year by purchase cost \$236.00.

The societies and institutions hitherto on our list of exchanges have continued to send their publications, and several new ones have been added. In all these ways: by the purchase of new books relating to the country as they appear, by keeping a lookout for such scarcer and out-of-print books as are in our line, and by the accumulation of exchanges, we are gradually coming into possession of a very valuable collection.

All of which is respectfully submitted.

ANDREW B. BAIRD,

Chairman.

Feb. 14, 1899.

REPORT OF JOINT LIBRARY COMMITTEE.

The past year has been an active one in the history of the Free Public Library. The number of tickets used for books was 1601, and the number of readers of magazines and newspapers was much the largest in the history of the Library.

The chief thing needed now is more space for the men's reading room. How that is to be obtained is a question for the Committee and the City Engineer.

The following is the issue of books for the year.

Fiction	29,737
Philosophy	333
Religion	261
Sociology	411
Philology	11
Natural Science	568
Useful Arts	92
Fine Arts	126
Literature	608
History	715
Geography and Travels	478
Biography	708
Magazines	1,698
<hr/>	
Total	35,746

During the year a supplementary catalogue of 931 volumes which have been added to the Library has been printed and given without extra cost to those who had purchased the original catalogue.

The books added during the year were 724 in number, at cost of \$1184.24, of which \$69.00 was for re-binding.

The books have been carefully selected and have been received with approbation, both by readers and the general public. A number of books suggested by the Labor representatives have been added.

The number of magazines and newspapers purchased by the Board was 64, amounting to \$259.30. The contracts for both books and magazines, etc., were awarded to A. Taylor.

The periodicals received by way of exchange by the

Historical Society were 151 in number, and these, along with all the books of the Society's Reference Library, are open to the public for consultation. The same thing applies to the Isbister Library, which belongs to the University, but is under the custody of the Society.

The Committee requests the Society to appoint two representatives for the current year on the Joint Library Board.

All of which is respectfully submitted.

GEORGE BRYCE,
Chairman.

REPORT OF THE ARCHAEOLOGICAL COMMITTEE.

Throughout the year several meetings of this Committee have been held, and much interest was manifested by the various members in this department of the Society's work, as evidenced by the large attendance on each occasion.

Since our last report, all of the cases have been thoroughly overhauled and cleaned and all specimens freshly labelled, while the larger objects of interest have been tastefully arranged upon the walls for better display.

The geological specimens, however, are still badly in need of more careful classification than the Committee has been able to accomplish, before visitors and students can derive that amount of benefit which a study of the collections is well able to give.

It is the intention of your Committee, with the consent of the Society, to allot this task to some capable person, under the direction of the chairman, and it is confidently expected that the value of our collections will soon be greatly increased as a result of his efforts, and that a great deal of benefit will be reaped by the Society, since to the great majority of visitors to our rooms, the museum is certainly the most attractive feature, even in its present somewhat disorganized condition.

The most important addition during the year has been, by purchase, a very complete and handsomely mounted collection of the Insecta of Manitoba.

The list of donations, however, we regret to say, has been unusually meagre, a matter which calls for the serious attention of all members of the Society.

In conclusion, your Committee would express its deep regret, that in consequence of being required to remove all collections from the two north-west rooms, so much of the time of some of its members has been spent to no purpose.

Your Committee, further, would call attention to the fact, that unless additional space be obtained to replace that which we are now called upon to give up, this part of the work of the Society will be seriously affected. Efforts are now being put forth to obtain the consent of the City Council to have the head of the stairs on the north side of the building floored over. If this be done some relief will be obtained and the difficulty for the present tided over.

All of which is respectfully submitted.

G. J. LAIRD.

Chairman.
